

Today I got to explore a bog with my seventh grade students. Together we stepped carefully onto the mats of floating sphagnum moss and identified plants such as pitcher plants and cranberries. It is an experience we won't soon forget! Thank you for making this experience possible for us.

From Trails to Timber, Wildlife to Watersheds...

Natural Resource Management Requires Knowledge

...and you Make that Possible

Forests aren't just one thing. They're hiking trails and campgrounds. They're habitats for wildlife, sources of clean water, and providers of timber for everyday products.

This careful balance—known as multi-use management—ensures that natural resources can meet the needs of people, communities, and the environment. But balance doesn't happen on its own. It takes education.

At Trees For Tomorrow, students learn first-hand how forests are managed for many uses. They see how timber harvests support jobs, how watersheds supply clean drinking water, how trails bring people together, and how wildlife depends on healthy ecosystems.

With your support, these lessons grow into lifelong connections—and future leaders who will sustain our natural resources for everyone's benefit.

Engaging hands-on programs in the outdoors that focus on sustainability and the science of nature.

Serving 5,000 K12 students from the Great Lakes states every year, plus thousands of families and adults.

Cultivating the next generation of industry employees, landowners advocates and leaders.

HELP CONTINUE OUR MISSION TO EDUCATE AND INSPIRE!

Your contribution makes a meaningful difference in the lives of students and the health of our environment.

From Dollars to Difference: Measuring Donor Impact

At Trees For Tomorrow, learning goes far beyond textbooks. Students immerse themselves in multi-use natural resource management, with forests, lakes, and trails as their classrooms. Days are filled with outdoor learning, free play, camp-

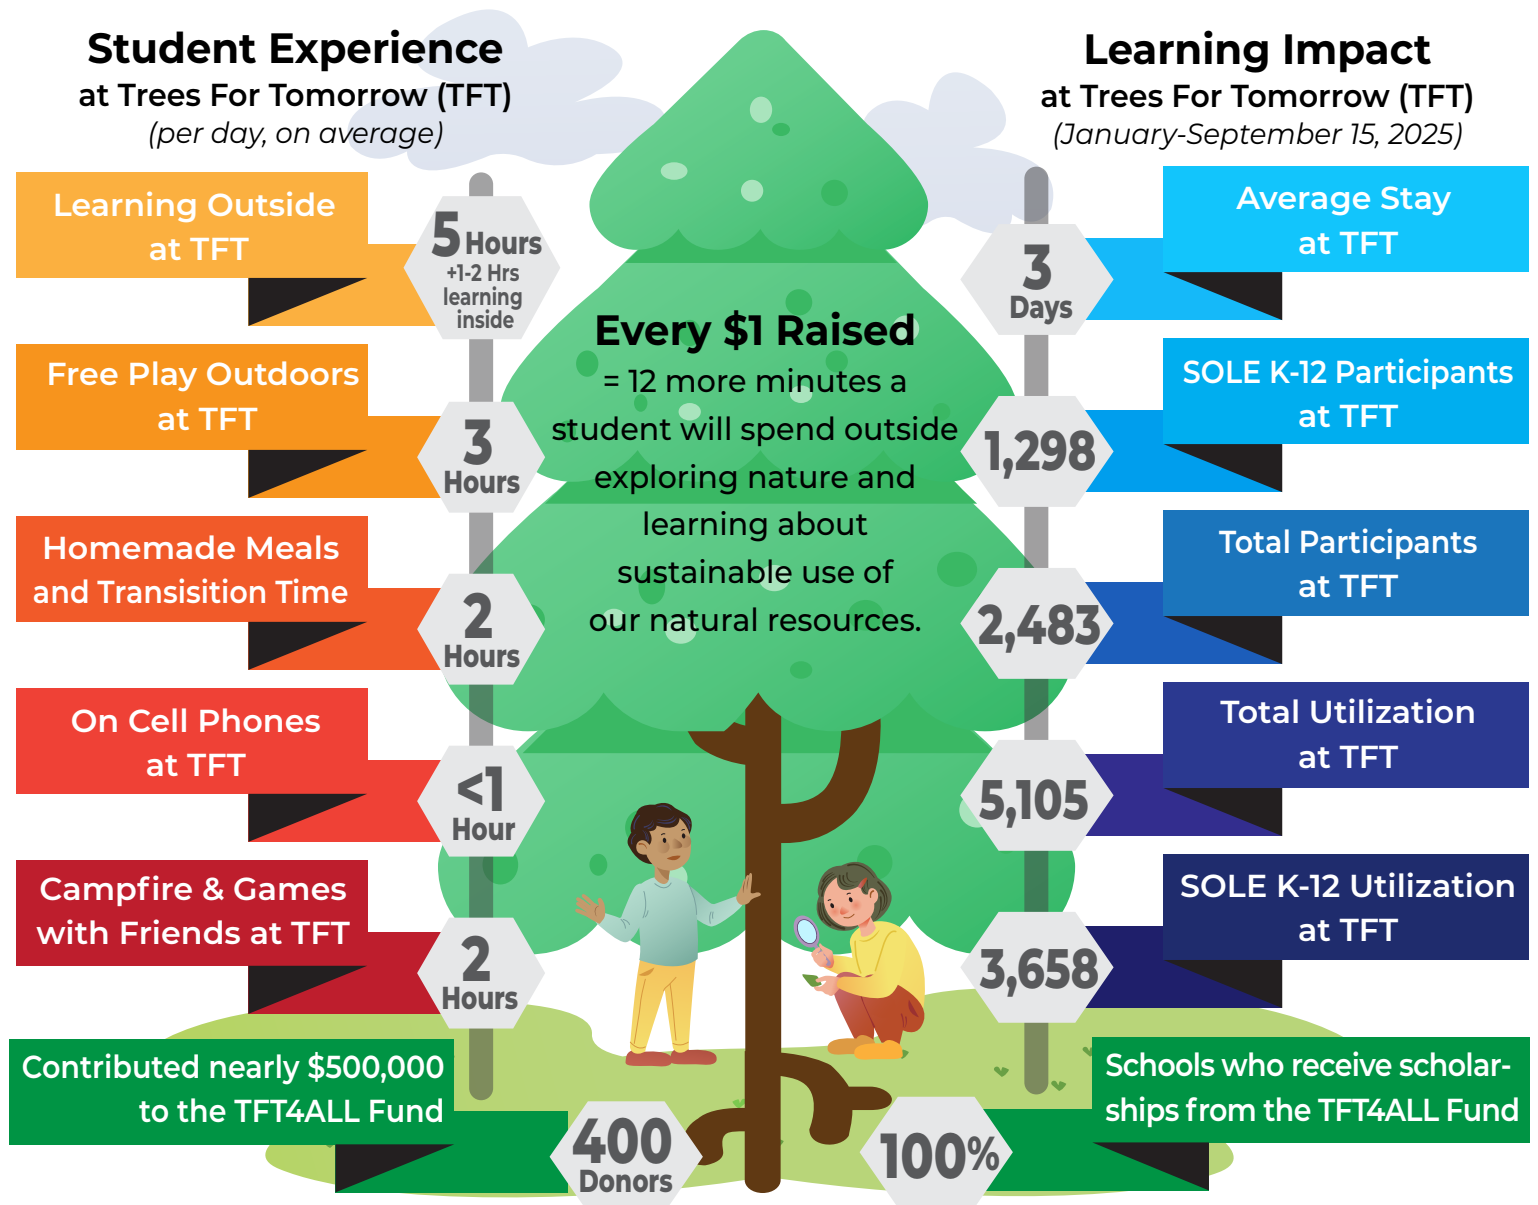

fires, and friendships—without the distractions of TV or cell phones. Thanks to generous donors, every student can take part. Each journey is unique, but the outcome is the same: a life-changing connection to nature and themselves.

Learning Impact

at Trees For Tomorrow (TFT)
(January-September 15, 2025)

It takes education to know how to manage natural resources sustainably and your support to make education possible.

DOUBLE YOUR IMPACT - Your contribution will be doubled (up to \$40,000) thanks to the generosity of ten of Trees For Tomorrow's legacy donors.
