TREE SEEDLINGS

WHITE PINE • WHITE SPRUCE • NORTHERN WHITE CEDAR

PRE-ORDER TODAY!

Each tree seedling has been grown in its own "cell" in nutrient-rich soil. These containerized seedlings, grown in northern Wisconsin, with their roots already growing in a plug of soil, have better universal survival rates than bare-root seedlings because they handle a variety of sites, dry weather conditions and poor planting techniques better. Although the seedlings are ready to plant when you receive them, they can be kept in their containers for weeks if watered regularly. This is a tremendous advantage—allowing you the flexibility of planting them whenever the season and weather are favorable and the danger of frost has passed.

White Pine (*Pinus strobus*)
Mature size: 75 - 100 feet tall.
Needs full sunlight.
Prefers moist, well-drained, loamy

White Spruce (*Picea glauca*)
Mature size: 50 - 80 feet tall.
Prefers full sunlight; can tolerate some shade.
Prefers moist, well-drained sandy soils.

Northern White Cedar (*Thuja occidentalis*)
Mature size: 30 - 50 feet tall.
Prefers full sun to partial shade; can tolerate some shade.
Prefers moist, well-drained neutral to slightly alkaline soils.

10 SEEDLINGS
